ABSTRACT

Provided are 225 instructional activities for educable and trainable mentally retarded children from primary through secondary levels in the areas of social skills, communication skills, and number skills. Each page of the kit is divided into the following headings: activities (listed from simplest to most difficult), correlated activities (to allow for subject integration), materials (usually available from the Instructional Materials Centers), and evaluation (questions to aid in the assessment of student performance). The back of each page has the same headings, but is to be used by the teacher for noting additional activities. Visual aids in the form of bulletin board suggestions, transparencies, or worksheets follow each section. Activities are provided for the following subtopics (number of activities are in parenthesis): Me (16), family (15), school and community (19), state and nation (17), occupations (24), clothing (13), travel and transportation (20), ecology (20), measurement (20), time (20), shapes and money (21), and problem solving (20). Also provided is a number skills pretest. Sample activities include having each child record facts about himself on a tape recorder (for the Me unit in social skills), reading the want ads together (for the Occupations unit in communication skills), and making a picture time line to identify the days of the week (for the Time unit in number skills).

Starter Kit

INSTRUCTIONAL ACTIVITIES FOR EDUCABLE AND TRAINABLE MENTALLY RETARDED PUPILS

SPECIAL EDUCATION INSTRUCTIONAL MATERIALS CENTER
DIVISION FOR EXCEPTIONAL CHILDREN
STATE DEPARTMENT OF PUBLIC INSTRUCTION
RALEIGH, NORTH CAROLINA 27602

FOREWORD

This publication has been written to serve as a resource for teachers in North Carolina who work with educable and trainable mentally retarded pupils. The booklet is merely a starting point that should be developed to fit individual pupil needs.

Acknowledgment is made to the staff of the SEIMC and the teachers in the field who developed this "Starter Kit."

State Superintendent of Public Instruction

September 1971

ACKNOWLEDGMENTS

The Special Education Instructional Materials Center wishes to acknowledge the cooperation and contributions of the following teachers:

Mrs. Gretchen M. Hamid	Raleigh City Schools
Mrs. Hattie P. Perry	Wake County Schools
Mrs. Alice K. Ware	Raleigh City Schools

Special Education Instructional Materials Center personnel involved in producing the Starter Kit were:

Theodore R. Drain
Mary Marcia Salsbury
Maxine Brown
Spencer Smith
Paul Lyda
Clarence McKee
John Wade
Linda Griffith
Donna Tyson

INTRODUCTION

The Starter Kit is designed to be a practical resource for teachers of exceptional children. It contains appropriate activities for many different types of pupils.

Some ideas might be the beginning of a well-developed unit of study or a long-range program. Suggested activities must be adapted to the level of the pupil. For example, a primary educable or trainable child might not be able to perform a task if it includes listing or writing, but he could verbalize or perform an adapted activity.

Each page of the Starter Kit is divided into the following headings:

Activities. The activities listed progress in difficulty. The first five or ten activities of each section are more appropriate for primary or intermediate children, while the secondary students should be involved with the ones toward the end of each section.

Correlated Activities. These provide ways to integrate various subjects around an instructional activity.

Materials. Items listed are available for loan from the Instructional Materials Centers with the exception of those starred. A bibliography is included at the end of each section. Contact your special education supervisor for a Union Catalog listing holdings of the SEIMC Network. For additional films and filmstrips check local school libraries and the North Carolina State Board of Health Film Library catalog.

Evaluation. Questions are included to re-emphasize the importance of observing student performance and of using these observations to develop an instructional program.

The back of each page includes the same four headings as the front of the page. This space is provided for notes, additional activities, materials, and observations.

(continued)

INTRODUCTION, continued

Visual aids follow each section. For example, the first visual aid pertaining to the section Me is labeled Me I. Aids are in the forms of bulletin boards, transparencies, and worksheets.

The Starter Kit is only a starting point for teachers. Activities can be expanded to fit continuing needs of the teacher and pupil.

S O C I A L S K I L L S

SOCIAL SKILLS

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
1. BULLETIN BOARD Teacher-made bulletin board. (See Me I.) Give each child a name tag. Put a name on each desk. Recognition of name and names of others.	Have each child to introduce another child.	See Me I, Me II	Does the child know his first name and respond when called? Can the child recognize his name under picture and on desk?
2. INTRODUCTION Teacher introduces younger children. The older children introduce themselves.	Have each child to introduce another child.	Getting To Know Me Myself 1-A	Does the child know his full name? Does the child give information in a complete sentence? Does the child speak loudly enough to be heard?
3. TOUR OF SCHOOL For young children, explain and practice lining up and the "buddy system" before touring the school. Visit the library, cafeteria, principal's office, gymnasium, first aid room, playground, water fountain, rest room, bus loading zone.	Have students take turns leading or students on error.		Can the child locate important places in the school?
4. MURAL Construct a mural (Me -- When I Grow Up, or any other appropriate title).	Have each child about his part mural. Write a go with his part information about vocational area.		Does the student have a realistic picture of his future?
5. CHART Construct a large chart, including weight and height. Teacher weighs and measure height of each child.	Math: Use of ruler. Writing numbers in the chart. Reading numbers on scales. Concept of height in feet and (continued)	See Me IV. Ruler, scales and Dairy Council charts.	Can the child read scales? Does the child realize a need to gain or lose weight?

6. CALENDAR Birthday calendar. Discussion concerning birthdays.	inches. Concept of weight in pounds. Art: Selecting picture from magazine or drawing picture. Math: Older children. Months of year and figuring age.	See Me V and Me VI	Does child know month, day, and year of birth?
7. SHARING TIME Meet me and my family. Name, address, phone, number in family and names of family members.	Role playing: Have children to take turns acting out family situations; getting ready for school, meal, a picnic.	Tape recorder	Can child give vital information when asked?
8. GUESS WHO Have each child to record on a tape recorder or cassette facts about himself. Play back and have others guess who.	Dry run with teacher before recording younger children. Write out information before recording older children.	Chart paper; Black ABC's; Learning to Live Together, P and I and II	Can child speak in complete sentences? Is the child able to remember vital information?
9. PHYSICAL CHARACTERISTICS Discuss five differences in physical characteristics of the students: hair texture, eye color, shape of nose, and others. Relate these to the individuals and races of people that have made the U. S. great.	Language Arts: Students can write a description or draw a self-portrait.	How To Address A Letter (film and record) National Audiovisual Center, Washington, D. C.	Can each child name the three major races of people?
10. INFORMATION Help students learn their address, telephone number, and parent's name.	Language Arts: Read, spell, and write addresses correctly. Discuss the importance of (continued)		Can each student write his address and telephone number correctly? (continued) 2

11. INTERESTS Help each student to list family members' favorite foods, pets, hobbies, etc. Write a short paragraph or story about one of the above topics.	using zip codes. Discuss differences in telephone numbers and list correct ways of using the telephone. Talk about emergency use of the telephone. Language Arts: Practice writing skills and correct for spelling. Game: Take student lists of family members, foods, pets, and hobbies, etc., and have other students guess the identity.	Chart paper; Southern Bell Kit, Teletrainer Let's Talk on the Telephone Drawing paper and crayons	Does each student know his parent's name and where he is employed? Can students match names of students with their lists of family favorite foods, hobbies, etc?
12. HYGIENE Discuss correct ways of dressing and grooming as they relate to personal hygiene.	Language Arts: Make a check list for students to follow when dressing and grooming themselves (See Me VII, Me VIII, and Me IX).	Health Department Films Check lists Me VII, Me VIII, Me IX. Dairy Council posters You A Resource Guide in Sex Education for the Mentally Retarded	Can each student give at least five steps to follow in good grooming?
13. HYGIENE Discuss skin care and appearance. Each student should list how he takes care of skin, hair, nails. Add the improvements that he would like to make in his appearance.	Science: Without too much detail, summarize the functions of the three layers of skin on the human body. Discuss complexion problems and what to do about them. Language Arts: Have pupils prepare reports to present to the class on (continued)	See Me VII. Use as a transparency to encourage class discussion.	Can students list five causes of bad complexion?

GIRLS						BOYS					
1. BETTY	YELLOW					1. TOMMY	BROWN				
2. KAY	BLUE					2. JOEY	PURPLE				
3. SUE	GREEN					3. HARRY	ORANGE				
4. MARY	PINK					4. BILLY	BLACK				
	(Make packets or heavy envelopes from tag board.)					5. STEVE	GRAY				
						6. JOHN	GOLD				
						7. BOB	RED				

Bulletin Board Idea:

- Write names in large block letters in a color that matches color of pocket.
- Pockets hold child's papers, artwork, etc., to be taken home.
- Using same color as pocket, color key child's chair, toothbrush, etc.
- Relate school attendance to chart.
- Put Clothing Doll (Clothing II) by name on the chart.

WHEN I GROW UP

Make a height and weight chart every three months. Compare. Decorate the bottom of the chart with student art work. (Charts are also available from the Dairy Council.)

WEIGHT

HEIGHT

NAME

BIRTHDAY CALENDAR

SEPTEMBER

Name	Day	Year
JIMMY		
SUSIE		
LARRY		

Make one chart every month. If possible, put the student's picture by his name.

BIRTHDAY ACTIVITY FOR YOUNGER CHILDREN

As each child's birthday comes, have construction paper cakes cut out (one for each child). Make a plate. Put the cake on it. Decorate with flowers (construction paper or cut from catalogues). Tell the children the number, and/or color of flowers, and/or leaves to get. Cut out construction paper candles. Put the appropriate number on the cake for the age of the child whose birthday it is. Put flames on the candles and each child's name on the back. Give the cake to the "Birthday Child" to take home as a present from his classmates.

MY CLOTHES AND GROOMING*

NEVER SOMETIMES ALWAYS

1. My clothes look right on me because I carry myself well.			
2. I keep my hair brushed.			
3. I keep my hair clean.			
4. I keep my clothes neat and clean.			
5. I wear the right clothes for the weather.			
6. I keep my nails clean and fairly short.			
7. I take pride in my clothes.			
8. My shoes are shined and in repair.			
9. I use deodorant and foot powders when necessary.			
10. I change my socks and underwear several times per week.			

*Taken from the Basal Program for Educable Mentally Retarded, p. 61.

GROOMING CHART FOR YOUNGER CHILDREN

Keep a chart each week for each child. Put a star each day by each area where earned. Keep the charts on file and compare for improvement. Give a bigger star at the end of the month if the child has improved.

HOW I LOOK

	Monday	Tuesday	Wednesday	Thursday	Friday
1. I am clean.					
2. My hair is neat.					
3. My teeth are clean.					
4. My hands are clean and my nails cut and clean.					
5. My clothes are clean and neat.					
6. I have eaten well today.					
7. I have played outside today.					
8. I have slept well.					

Do #6 after school lunch.
Do #8 after children's rest time.

FAMILY

SOCIAL SKILLS

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
1. FAMILY UNITS Display pictures of animal families: cats horses birds cows, etc. dogs	Oral discussion of family units. In magazines find pictures of animal families. Paste on construction paper.	Pictures of animal families; magazines; construction paper.	Can child recognize pictures of family grouping? Human family with father? Some animal families with mother and young?
2. FAMILY PICTURE Have children draw a picture of family. Make a folder to hold all work on the family unit.	Math: Number concepts. Number of brothers and sisters; total number in family. Use available story-filmstrip to show love, sharing, working, playing in a family unit. In a human and animal family. Family Fun Time: Discuss activities families can do together. Draw or find pictures. Put in folder. Do by seasons.	See Family I. Negro Family Story Set <u>White Family Story Set</u>	Can child name other members of family?
3. HEALTH HABITS Good health habits for my family. Make a large class chart.	Have younger children to contribute and then duplicate to go in folders. Older children can copy from chart.	Large chart paper. See Me VI, VII, VIII.	Does child develop good health habits, such as bathing, brushing teeth, keeping clothes clean, eating proper food?
4. MANNERS Discuss the importance of having good manners at home and at school. Show examples of good and poor manners. Practice good manners every day in cafeteria. (continued)	Language Arts: Discuss proper manners to use when eating. (continued)	Pictures of correct table setting. <u>The Human Value Series</u> <u>Teaching Pictures</u>	Can students recognize the different table manners and discuss them? Are students showing improvement (continued)

Make a large permanent bulletin board (approximately 3' x 5'). Make cards with the days of the week. Punch a hole in the top of the cards to hang on picture hangers. Hang the cards up each day. Give each child one job a day.

Cut out or draw a picture for each job. Label jobs.

For very young children, write each child's name in a different color.

Give jobs the child can really do. (Example: Child with one paralyzed hand cannot serve juice. One hand may be strong enough to hold a cookie tray.)

CURIOUS TRAVELER

PURPOSE: To encourage attentive listening to oral directions.

PLAYERS: Class

MATERIALS: None

DIRECTIONS: The teacher begins by telling the children that each of them is going to be a "Curious Traveler*." The teacher then gives the following directions and the children act them out:

The traveler stood up. (Children stand)
 He looked to the North.
 He looked to the South.
 He looked to the East.
 He looked to the West.
 He then turned around and faced the North.
 Then the West.
 Then the South.
 Then the East.
 Then he stood on tip-toe to see over his neighbor's shoulder.
 He smiled at what he saw.
 And sat down.

The game is then repeated using modified directions.

*From Listening Games. Wagner, Hosier, Blackman, p. 14.

The pupils will want to learn their way around the school, home, and community. On the floor, place two large sheets of paper which have been fastened together. These sheets of paper are four or five yards long and the pupils can walk on it. Highways and roads are designated. Intersections with stop signs, railroads, etc., are added. Pupils construct their own home of milk cartons, print their name on it, and place it on the map where the pupil lives. Also construct the school, post office, churches, etc., and place them in the proper location. Now, they are ready to explore. Each pupil is shown individually how to get from his home to school and back again by walking on the map's highways. Teach them to stop at intersections and look both ways before going on. The students can take a field trip to other places on the map.

From 101 Activities for Classes of Pupils Who Are Retarded, p. 26, Alpha Brown.

STATE AND NATION

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
(Most of the activities in this section are advanced and are more appropriate for junior and senior high level pupils.) 1. MAP STUDY Have map study of the following maps: town, city, county, state, and nation. Note the differences in the amount of detail on each map.	Science: Learn terms associated with map reading, i.e., boundary lines, highways, railroads, rivers and mountains. Make a glossary of these terms.	Maps of towns, cities, counties, states and U. S. <u>Finding Ourselves</u>	Can each child identify at least two terms associated with map reading?
2. GLOBE Compare the difference between a globe and a world map as found in an atlas. List the differences.	Geography: Locate the continents and oceans on maps. Language Arts: Discuss the differences that exist in living conditions in other countries.	Globe, flat map, and atlas. Pictures from other countries. Filmstrips	Can each student locate the continent of North America on different kinds of maps?
3. LOCATION Locate North Carolina on a large map of the United States and also locate: State Capitol, State parks, largest city, historic sites, hometown.	Language Arts: Discuss the importance of the state flag and learn the state bird and state tree or flower. Math: Measure distances; (1) Compute the cost of fare on bus, train, and plane. (2) Compare costs of the tickets. Science: Study the different types of climate that exist in North Carolina. (1) Discuss causes of weather conditions. (2) Study the seasons.	Pictures of state flag, bird, and tree; map of state. Pictures of bus, train, and plane. Examples of the different types of N. C. climate. Pictures of historical places in N. C. Outline maps of N. C.; crayons.	Can students name the state capital, bird, and tree?

4. LOCATION Locate students' home town on map of N. C. and discuss interesting places or facts about their area of N. C.	Bulletin Board: Show the state flag, bird, tree, and historical places. Geography: Use outline maps of N. C. to color in the three sections of N. C. (mountain, piedmont, and coastal plain). Use outline map to make economic maps. Paste pictures of products in area where they are grown. Use outline map to locate cities, rivers, interesting places or other facts about N. C. Music: Learn N. C. songs.		
5. FAMOUS PEOPLE Make a list of famous people from N. C. and discuss the important contributions they have made.	Language Arts: Have the class make a scrap book including interesting facts about their town. Make reports on places of interest.	Construction paper, crayons, pictures.	Can students locate their home town on a map?
	Language Arts: Make reports on N. C. favorite sons. Art: Draw pictures of famous people. Geography: Find the locations of birthplaces of famous N. C. people on the map.	Pictures of well-known N. C. people.	Can students match famous people with their achievements?

6. MAJOR CITIES Locate major cities and learn main industries in N. C.	Geography: Locate cities on N. C. map. Locate main areas in which crops are grown. Language Arts: Make reports on leading industries. Bulletin Board: On large outline map of N. C. picture the main industries and major cities.	Large outline map of N. C. Examples of leading products of N. C. Films and filmstrips.	Can students list three major products of N. C.?
7. MODEL OF NORTH CAROLINA Make a plaster of paris scale model of N. C.	Work with plaster of paris and outline drawing of N. C. on cardboard. Geography: Discuss the different land forms as students make the scale model.	Plaster of paris, heavy card board, outline of N. C.	Can students locate mountains, piedmont, and coastal plains?
8. FLAG Discuss the importance of the national flag, its colors, origin, and the places it might be displayed.	Music: Learn national anthem and other national songs. Art: Draw pictures of the flag. Language Arts: Write short stories about the importance of the flag.	Small replica of the flag. Our Flag and Our Country Series (record and filmstrips)	Can students list at least two proper ways of displaying the flag?
9. PRESIDENTS FROM NORTH CAROLINA Discuss the differences that exist between the governor and the president and the duties (continued)	Language Arts: Make reports on presidents that have been born in N. C.	Paper; postcards showing statues of three N. C. presidents (Jackson, Johnson, (continued))	Can students name the presidents from N. C.?

that each have. List the differences. Learn their names.	Language Arts: Let students give campaign speeches. Discuss the correct procedures to follow in electing class officers.	and Polk); and birth-place of Andrew Johnson.	Can students list steps in electing class officers?
10. ELECTIONS Have students nominate and elect class officers.			
11. VOTING Examine a scale model of a voting machine.	Language Arts: Discuss proper procedures in voting. Discuss the importance of registering to vote.	Picture of voting machine or drawing of one. <u>My Country</u>	Can students arrange the proper steps to follow when voting?
12. NEWSPAPER READING Study the newspaper and discuss the importance of current events to the students. Discuss different sections and learn to locate helpful information. For example: weather report, obituaries, and want ads.	Language Arts: Write newspaper articles for the school newspaper. Field Trip: To newspaper office. Bulletin Board: Include current events which the students are interested in. Write newspaper articles.	Local and school newspapers. <u>The Newspapers You Read</u> , <u>Turner-Livingston Series</u> <u>Newspaper Reading, Law-son</u> <u>Enriching the Curriculum with Current Events</u>	Can students find information in newspapers given to them by the teacher?
13. DESIGN OF THE UNITED STATES Make a patchwork design of the U. S. Practice putting together U. S. map puzzle.	Language Arts: Give reports on the States of the Union. Geography: Learn names of states and their locations.	Pieces of cloth, outline map of the U. S. and needles and thread. U. S. map puzzle.	Can students locate at least five states?

14. DRIVER'S EDUCATION Discuss the requirements for getting a driver's license in North Carolina.	Art: Gather different colors of cloth. Assemble in U. S. map and have students embroider names of states on the map. Language Arts: Study the book entitled <u>Driver's Refresher Handbook</u> (simplified edition). Study traffic laws and road signs. Draw pictures of all the signs.	*<u>Driver's Refresher Handbook</u> (free from Department of Community Colleges. Highway signs, from Highway Department.	Can students pass a sample written driver's test after studying the book?
15. LAW Discuss the location and services rendered by the civil and criminal court houses in the student's area.	Field Trip: Visit the civil and criminal courts and, if possible, sit in on an actual case. Discuss the procedure a student would follow if he received a traffic violation. Discuss the difference between misdemeanors and capital crimes and list the penalties for each.	*<u>You and The Law</u>. Holt, Rinehart and Winston (teacher resource) Law: <u>You, The Police and Justice</u>	Can students give the steps he would follow if he received a traffic ticket?
16. CAPITALS Learn to locate the state capital and the United States capital.	Language Arts: Discuss the ways the two capitals are alike and the ways they are different. Discuss the difference between state representatives and senators and U. S. representatives and senators.	Pictures showing the State and United States capitals; list of State and U. S. representatives and senators. <u>My Country</u>	Can each student locate and name his state capital and the United States capital?

COMMUNICATION SKILLS

OCCUPATIONS

COMMUNICATION SKILLS

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
1 - 9. See <u>Social Skills, SCHOOL AND COMMUNITY</u>, for activities for primary and intermediate. 10. DEFINITION What is an occupation or job? - Class discussion to decide on a definition. - Write the definitions. - Check in dictionary. - Compare definitions, using the best of both to create the class's own definition. - Discuss illegal jobs and jobs for boys and girls under age. - Start "Occupations" notebook. - Enter definition on first page of booklet after title page. 11. JOB DESCRIPTIONS Students choose 3 or 4 occupations that they would like to know more about. Look through available resources to find information or pictures concerning these jobs. Write or compile a report. List good and bad features of different jobs chosen. Add this information to booklets. 12. QUALITIES Qualities that are needed to be "at your best" on the job: a. Alert (define)	Using clay, model an "action person" - a person doing his job. For example: policeman directing traffic; plumber fixing sink; baker holding bread. Display with labels, or paint pictures and display with labels. Visit actual work situations in the community Health: Discuss health patterns that will help you be alert, e.g., enough sleep and starting	Dictionaries. Filmstrips, <u>Occupational Education Series</u> <u>Eight to ten</u> sheets of paper stapled together; construction paper for cover. What Job For Me? Series <u>Library books</u>, magazines, and newspapers Charts describing different jobs Filmstrips	Can the students use a dictionary? Do students know what jobs they can or cannot hold due to age limitation? Can students describe orally or in writing, a particular job, its duties, and good and bad features?

b. Being a Clean and Neat Dresser Have two students as actors. One fixes up as neatly as possible. The other one will mess up his hair, dirty his hands, and untie a shoe to give a sloppy appearance. Another student can introduce the story saying: "Today we will visit the manager's office and watch him interview two boys for the same job. See which boy you would hire." c. Punctual Find definition. Discuss its importance. d. Dependable Find definition. Discuss its importance. e. Hard Working How can we tell if a person is a hard worker? f. Job Choices	the day off with breakfast. Have students keep a record of actual breakfasts they eat for a week. Have each student plan an adequate breakfast menu. (For a more detailed study see Occ 0) Students can make a bulletin board showing "good" and "bad" workers. See charts and activities listed under Social Skills. Encourage discussion about the role-playing situation.	Occ 2a	Can the students plan an adequately nutritious menu for breakfast? Can students watch other students act out a scene and then respond with their own ideas?
	Discuss each question found on form Occ 1. Have each student fill out the self-measurement chart, Occ 1. See Occ 2a and 2b for bulletin board.	Self-Measurement Chart, Occ 1.	Can students fill out Occ 1 and do they understand the terminology on the form?

13. JOB TYPES Give the class three groupings of occupations. Write the groups on the board: Service Professional Home Arts Each student could write on the board an occupation that would fall under one of the categories. Try to list five under each. Discuss qualifications necessary for jobs. Stress the value of each position. Stress our dependence on the service jobs such as road workers, telephone linemen, truck drivers, garbage collectors, farmers, telephone operators. Discuss specialization of jobs. Discuss sheltered workshops, if applicable to some students.	Make into transparency, worksheet or chart. See Occ III.	<u>Getting A Job</u>	Can the students write names of occupations on the board under the correct category?
14. VOCATIONAL COUNSELOR Invite vocational or employment counselor to come and speak to the class. Counselor might explain how students will be evaluated on "in-school" work experience (if applicable).	Student booklet describing services provided for students by the counselor (V.R. or other plan) might be discussed with students.	Pre-vocational Training Evaluation Sheet, Occ IV. Teen-Agers Prepare for Work, Books 1 and 2	Can students tell each other why all jobs are important?
15. LOOKING FOR A JOB Read ads together. Each person could choose an ad to read that sounds most interesting. What do you think your duties would be in that position?	Use stencil Occ V with want ad from local paper that would be applicable in local situation and also within capabilities of particular students.	Newspapers Turner-Livingston Series: <u>The Newspapers You Read.</u> <u>Newspaper Reading</u>	Can students read orally an ad for a job? Can the student realistically describe the job situation?

MATERIALS

EVALUATION

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
16. PERSONAL INFORMATION Review of personal information before filling out actual applications.	Using personal information have each student make a card for billfolds with this information.	Small index cards for billfold information cards.	Can student write and furnish correct personal information?
17. APPLICATION FORMS Use application form words for spelling words, finding definitions, writing lesson.	Compare words used on different application forms. Compare directions given on various applications.	Applications from businesses in the area. Occ 7 and Occ 8.	Can students correctly complete application form?
18. REFERENCES Discussion: - What are references? - Why would an employer want references? - What type of person would you ask to be a reference for you? - Contact references. Practice writing their name, street address, city and state, occupation and position.	Locate names and addresses of references in the telephone directory.	Telephone directories.	Can the students suggest possible references and write the necessary information?
19. ROLE PLAYING FOR JOB INTERVIEW Set up an office situation, including the personnel manager, secretary, and person interviewing for the job. Discuss what appropriate dialogue would be for each role. What would you say to the secretary when you entered the office? What would the secretary say? Would she give you something to fill out? Where would you go to write? Do you have the appropriate writing tool? What do you do if you do	Practice answering a want ad by telephone. - Telephone manners. - Information necessary to have. - Questions to ask.	Teletrainer from Bell Telephone (available to teachers in the Bell Telephone area). Filmstrip on the interview.	Can students play a role in a job interviewing situation?

not understand a part of the form? What do you do when you finish the form? - How do you greet the person who will interview you? Do you shake his hand? - Ask other similar questions. - After deciding on possible dialogue, give each student a chance to play a role.	20. PICTURE YOURSELF Ask students to think of a job that they would like to have. Using materials, take 20-30 minutes to make a collage. Through the collage try to show how you feel in that job; what your thoughts might be. Pair students together to tell each other about their collage.	Construction paper, magazines, yarn, seeds, sticks, ribbon, buttons, paper clips, bobby pins, glue, scissors, etc. Set these materials up and let students choose which they want to use.	Can students express their feelings through this art media? Can students orally express the feelings represented in the collage?
21. GETTING READY TO WORK Check on birth certificates, if necessary to get a job. Students could write the Health Office of the county in which they were born; or, the Bureau of Vital Statistics, State Board of Health, in their home state.	Visit local Health Department. Locate birth certificates of students born in this county.	Comic books and films available at Social Security office.	Can students write a letter in proper form to obtain a copy of their birth certificate?
22. SOCIAL SECURITY NUMBER Obtain a Social Security number. - Fill out a sample application (continued)	Ask why some Social Security cards have blue numbers and some red. (continued)	Comic books and films available at Social Security office.	Can student fill out an application for a Social Security card? 32

MEAL PLANNING

<u>Activities</u>	<u>Correlation</u>	<u>Evaluation</u>
- Plan a breakfast dividing responsibilities among the group. Students should choose their interest, if at all possible.	- Enlist the aid of lunchroom manager for this project. She can be a resource in planning a menu and providing cooking facilities and utensils.	
- Make charts with names of students in the group and group responsibilities for each area. Post in the room.	- If foodstuffs cannot be obtained through the lunchroom, check with the PTA, a woman's club, or a church group that might like to get involved.	
- Select sample menus. Vote on first choice.		- Can students select a proper menu?
- Find recipes and copy them on large note cards. Practice measuring liquids and dry ingredients.		- Can students copy a recipe correctly and measure the necessary amounts?
- Establish budget and figure expenses. Buy the items needed.	- This might necessitate a trip to the store to get correct prices. Make a list of items and their prices. A mother or the school cook will be needed to help answer questions and supervise the cooking activities.	- Can students make a list of items and their prices and find the total amount needed?
- Make a time schedule for preparing food, and prepare food.		- Can students prepare the food according to a schedule?
- Write letters of invitation to guests, if any.		- Can students write an invitation to a guest?
- Table setting and centerpiece arrangement.		
- Discussion of acceptable table manners.

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
1. GUESSING GAME Teacher: "I am thinking of a person with a pretty blue sweater on." Children guess who it is. The described student stands and says, "It's me--John." 2. SEASONAL CLOTHING "What kind of clothes do you have on now? Why?" Discussion of lightweight and heavyweight clothing. 3. CLASSIFYING PICTURES Classify pictures of clothing according to summer and winter. 4. TYPES OF CLOTHING Discussion of play clothes, work clothes, and "Sunday best." 5. CLOTHING COLLAGE Provide each student with an outline of a person. Provide materials for children to "make" the clothes. Allow ample time. Draw on shoes, hair, etc. Materials should be pasted onto the outline. Use heavy paper, if possible. Let the child describe the person. Who is it? Where are they going? Display finished work in the room	Write descriptor phrases on the board. Examples: blue sweater red socks Identifying objects. Clothing I. Make word cards to add to card file. Examples: dress coat hat cap shoes Children make scrapbooks of clothing. Make sentence strip for each using students' descriptions. Read together and add to the display. For trainable and young children make a paper doll that resembles the individual as much as possible. Make clothes with tabs so children	Peabody Language Development Kit, Level P Pictures of various types of clothing. <u>Clothing (film)</u> Scraps of material, ribbon, buttons, thread, crayons, paste, glue, heavy paper, etc. Clothing II and III.	Can students identify themselves by recognizing descriptions of their clothing? Can students classify clothing into appropriate seasons? Can students participate in a discussion of clothing? Can students clothe a model using "scraps"? Can child match clothing to his own type and color? Can students orally describe their work?

6. CLOTHING AND OCCUPATIONS "Often we can tell people's jobs by their clothing. Let's name some." Show pictures and discuss the differences. 7. CARE OF CLOTHING Prepare with two students ahead of time to role-play this situation: One student going home, taking off his jacket-and throwing it down, kicking his shoes off in the middle of the floor, his socks thrown around. Another student going home, taking his jacket off, hanging it up, taking off his shoes and socks and putting them away. Or, make up your own situation that would be appropriate to your class. Discuss the play with the class. What were they doing? Which way is better? Why? Does it matter how we take care of our clothes? Stress only the care of clothes, not whether they are old or new.	can hook clothes on doll. Child dresses the doll as he is dressed every day. (See Clothing II and III.) See Clothing IV. Make a chart listing ways to care for clothes. Use to motivate the making of a clothes care chart.	Pictures of policemen, nurses, waitresses, hard hats, firemen, soldiers.	Can students discuss the care of clothes? Can students suggest proper ways to take care of their clothing

8. REPAIRING AND MAINTAINING CLOTHING Discuss the "sewing tools": - needles - thread - thimble - yardstick - tape measure Use scraps; sew buttons to the scraps of materials. Make designs with the buttons. Put all scraps together into a collage. Write descriptions of the collage, or of individual students' work.	Give directions concerning using a needle and thread. Use double thread for a button. Do not make thread longer than arm. Actually repair clothing; sew on buttons, repair hems, mend tears, etc.	Have available: - needle, thread, thimble, pins, yardstick, sewing machine, scraps of material, buttons. - Snip, Clip and Stitch	Can students recognize and name sewing tools? Can students write a description of their design or of the collage? Can students make a simple repair on an item of clothing?
9. TYPES OF MATERIAL Name types of material.	Make bulletin board. Tack scraps of material on board and label them. Note for setting of iron; how to wash.	Types of scrap material - wool, cotton, knit, velvet, silk. - Word card for each type - Pictures of sheep, cows, silkworm, cotton.	Can students name different types of material? Can students identify source of the fabric?
10. WASH AND IRON CLOTHING. Discuss types of detergents.	Correlate with pollution of streams, rivers, etc.		Can students wash and iron clothing?
11. STYLES OF CLOTHING What are some clothes that are "in style" now? List on the board the responses.	Word Game: See how many words you can make using the letters in: - bell bottoms - hot pants		Can students discuss clothing styles? Can students list at least five words in the Word Game?

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
1. INTRODUCTION Jump up and move to another place in the room! - Allow time for everyone to locate. - Talk about ways the children moved. Did they walk? Run? Skip? Crawl? (Ask a child to show each of these movements.) - All of these are ways to move or travel. Introduce word on card and start word ladder by stringing words on a long shoestring.	Physical Education: running skipping jumping hopping walking (Examples: elephant walk, duck walk, walk on balance beam, others the children suggest) Music: Musical games involving movement. Examples: Here We Go Around the Mulberry Bush; <u>Skip</u> to My Lou; <u>Hop</u> Up, <u>My</u> Ladies.	Word card: <u>travel</u>	Can children orally describe the way they moved about in the room? Can children identify the word <u>travel</u>?
2. DIRECTIONS While students are in their new place discuss their surroundings. - What is in <u>front</u> of you? - What do you <u>see</u> <u>behind</u> you? - Who or what is <u>beside</u> you? - (Do the same using <u>left</u> and <u>right</u>.) - Are you close to or far away from the front of the room? From the back?	Art: Draw a picture: of someone in front of you; something behind you; someone beside you; to the right and left of you. At the bottom write a sentence describing the location relationship.	Paper, crayons. See Travel I and II. Word cards: over right under toward on left beside Let children put them in the correct places.	Do students understand the location words? Can they draw a picture to show the spatial relationship?
3. EXPLORING Take a walk exploring the school building. (continued)	See School V. Make map for the school building.	<u>Going Places</u>	Can children find their way around the school building?

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
Find their own classroom and the classrooms where friends or relatives are; find stairs, hall, bathrooms, library. If children are already familiar with the building, explore it keeping in mind which room is closest to the library, or farthest away from the classroom, which is smallest and largest, etc. - Make an experience chart of the trip. - Make a map of the school, labeling the rooms. (Small wall map)	Art: Give clay to each child to make something to travel in. Teacher should observe informal language development.	Chart paper; magic marker	Can the children describe their walk? Can they make a simple map, labeling the rooms?
4. TRAVEL TYPES Let's name as many ways to travel as possible. - Write words on the board or on a chart. car bus train wagon bicycle boat horse space ship scooter airplane - Which of these are fast? - Which of these are slow? - Which of these are alive? - Which are run by motors?	5. ROLE PLAYING Have 4 or 5 children choose a mode of transportation that they will pretend to be using. Introduce children by name. Let others guess.		Can students role-play a type of transportation?

ACTIVITIES

NOTES

MATERIALS

EVALUATION

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
6. STORY Read a story about travel. Perhaps choose one that some of the children might read. For example: 1. "Look! Eddie Can Read." Scott-Foresman Open Highways. More Power. 2. "The Cat in the Hatware Store." <u>Splendid Journey</u>. Scott-Foresman Open Highways.	Put books, posters, magazines, on travel in an area in the room where they will be easily available to students to spark their interest. Show travel films and filmstrips.	Books, pictures, poster on travel. Films and filmstrips.	Can students listen to a story? Do the students look at the material in the room?
7. LET'S PLAN A TRIP (This may be a real or an imaginary trip.) - Decide location. - How will class travel? - How long will you stay? - What do you plan and hope to see and do? - What type of clothing should we wear, considering the weather and location? - Will you bring something back? In planning, let the children be as creative and imaginative as possible. If it is an imaginary trip to a far away place, they might travel by airplane (using their arms as wings, etc.).	To correlate with the unit on travel, the trip might be to the airport, or another appropriate place. Or, the trip might be walking to a nearby park or store, depending on your resources. If an actual trip is taken, be sure to get parental permission, arrange for transportation, etc.	Safety For Me <u>Safety on Streets and Sidewalks</u>	Can students talk about where they would like to go?
8. CHART Make a chart outline of the trip plan. Use students' suggestions. Underline words such as <u>walk</u>, <u>class</u>, <u>stop</u>, <u>street</u>. Make a word card and add to the word ladder and student's file box.

9. TRAVEL BEHAVIOR Discussion on reasons for good behavior when traveling in a group, and how they can be helpful to one another. 10. GO ON THE TRIP If the trip is just a walk to the playground, make it special by singing songs or taking a new story to read or a new game to play after you arrive at the location.	Practice at school before a trip.		Can students give suggestions and examples of good behavior?
11. REPORT After returning, ask the children to tell each other what they enjoyed most or remembered best. Record the child's report and save to compare with speech development by the end of the year.		Tape recorder, tape.	Can children tell about their experiences?
12. MAP ACTIVITY Follow the map. Divide class into groups. Draw a map for each group to follow. On the map label the key landmarks. You might make this activity a Treasure Hunt, having students follow clues until they find the place. By dividing the groups you can use vocabulary (for the clues) that is appropriate for that group. At the end of the hunt, have a reward, such as candy, or something your students would enjoy.		Maps drawn on large pieces of construction paper.	Can a group of students read and follow the directions on a written map?

13. SIGNS - What do these signs mean? - Have you seen one on the highway or street? - Where is one of these signs? - Why is it necessary to know what this sign means? - Students may choose one of the words and draw a picture or write a story to describe it. For motivation, discuss experiences they have had going to and from school or around town.	Travel II	Charts of common road signs. <u>Safety Signs On Our Streets</u> (transparentcies) Possibly borrow actual highway signs from the Department of Motor Vehicles or local Highway Patrol office.	Do students know what to do when they see each word that is on the bulletin board? Can they write or dictate an experience they have had involving their travel?
14. HOW TO FIND HOME - Are there places in your neighborhood that you remember? - Do they help you to know where you are? - If you saw a _____ (pick a landmark that would be familiar to your students) would you know your location? - Let's list on the board some familiar places or objects that give clues to help you find your way. These are <u>landmarks</u>. (Introduce word card.)	Social Studies: Discussion of famous North Carolina landmark, Lighthouse at Cape Hatteras.	Picture or article on Cape Hatteras Lighthouse. Word card: <u>landmark</u>	Are students aware of landmarks in their neighborhood?
15. FILM Show film or filmstrip of another country or part of the U.S. with an obviously different culture. - Discuss noted differences, such as clothing, geography. - Guess the location, or if name is mentioned in film, find the spot on a map or globe.	Social Studies: Discussion. Many different types of people live in the world. What makes cultures different?	Post cards, travel posters, from friends or agencies. Map or globe Airplane Trip (film) Boats & Ships (film) Passenger Train (film)	Can students observe differences shown in the film?

16. HOW WOULD YOU TRAVEL . . . (Write on board) . . . to go uptown? . . . to New York? . . . to church? . . . to another state? . . . to the moon? . . . to Japan? . . . to the cafeteria? Discuss types of transportation that would be appropriate. - Which types of transportation would be fastest? - Which would be most comfortable? - Which would be most expensive? Most economical?	Students might illustrate one of these situations. Field trips.		Can students describe characteristics of different types of transportation?
17. TOOLS FOR TRAVEL What are some tools for travel? List tools on chart: - maps - road signs - landmarks			Can students name tools that people use in traveling?
18. SIMPLE MAP Each student draws a simple map of how he goes to school or work, including stoplights, signs, etc.			Can students draw a simple map?
19. CITY MAP Introduce a city map. Make word cards including name of city, large streets, important landmarks. All students find their street on the map. Find the school.	Put plastic over the map for students to mark their route with grease pencil.	City map, clear sheets of plastic	Can students read a city map finding their home and school?

COMMUNICATION SKILLS

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
1. BULLETIN BOARD Make a bulletin board entitled <u>Let's Look At Our World</u>. Students cut out pictures of things in our environment. Paste on construction paper. Discuss and classify the objects. Label groups and display on the bulletin board.	Perceptual-motor activity might include tearing out the pictures rather than cutting.	Magazines, scissors, paste, construction paper.	Can child cut and paste a picture, naming and classifying the objects?
2. DISCUSSION How Do We Know Our World? Ask questions: - How do you know there are chairs in this room? - How can you tell what we are having for lunch? - How do you tell the difference between salt and sugar?	Science: Use transparency Ecology I. Point to a part of the body. "What do we do with this part of our body?" See with our eyes. Hear with our ears. Taste with our tongue. Touch with our hand. Smell with our nose.		Can students verbalize how they perceive their environment?
3. SENSE AND TELL Play Sense and Tell game. Blindfold a student. A. For tasting and smelling experiences have items wrapped separately. Let the students guess what he is tasting. Make a label for the item.		Cracker, chocolate kisses, bread, apple, lettuce for tasting. Coffee, perfume, tobacco, glue, chalk for smelling. Sandpaper, cotton, play dough, masking tape, dish of water, comb for touching. Bongos, triangle, tambourine for hearing. *Records of sounds.	Can students orally describe objects identified by use of one of their senses?

*Many of these activities are based on Environmental Education, Division of Science Education, State Department of Public Instruction.

B. For touching experiences: - Put one item in a bag or box. Student puts his hand in to feel it. After guessing, take the item out and label it. C. For identifying sounds: clap hands play instruments stomp feet whistle knock Each student should have a turn to identify his experience.	Identify body parts.		Can students point to the correct body part when the chart is read?
4. OBSERVING Select pictures from the first activity which relate to the environmental problem. Add pictures or charts of beautiful natural settings, and of littered streets and other evidence of pollution. Discuss what caused this area to become dirty. Introduce word card. "What do you think pollution means?" "Do we have any pictures of pollution? Do we have pollution here in our room or school?"	Science: Plan a soft shoe walk outdoors. The soft shoe signal means everyone should be completely quiet. Listen for natural sounds. Make a class book of beautiful things or collections of wood, fallen branches, fallen leaves, seeds, nuts, feathers, rocks. Label names of objects and/or use as inspiration for still life drawings.	Magazines; pictures of smog, car exhaust fumes, littered picnic areas. Word cards: land air water pollution	Can students find differences in 2 sets of pictures? Can students point to and name air, land, and water pollution? Can students suggest that paper, bottles, etc., on the school ground are types of pollution?
5. CLEANUP WALK Plan a cleanup walk. Choose a section of school ground that your class will be responsible for cleaning up and keeping (continued)	Art: Make a litterbug. Stuff a large brown bag for the body. Add head, legs, etc. Paint and add trim.	Paper bags, newspapers, paint, string, buttons, paste, pipe cleaners.

cleaned up. Plant bulbs or see if a local nursery will donate a bush. Initiate a cleanup campaign for all the school to share in. Write an experience chart to be read together. Display in the classroom. 6. SET UP AN AQUARIUM Involve students in all stages of planning; i.e., where to set up the aquarium, placing gravel and plants. Have materials in science center (including books) to arouse interest and questions. Read parts of a book on setting up an aquarium or read parts that answer the children's questions. (It is most important that you choose a book the students will enjoy <u>listening</u> to. Ask questions to <u>key listening</u>.	Each child illustrates cleanup scene on paper. Make into a class booklet.	Aquarium and necessary filter pump, etc. Gravel, plants, books on fish, fish, snails	Can students take part in planning the aquarium by asking questions, making suggestions?
7. CHART Make a chart, <u>Steps in Setting Up An Aquarium</u>. Use information from books and children's ideas to compose the chart. Read and write it together. Underline key words. Make a box of aquarium words. Following directions on chart as closely as possible, set up aquarium, adding fish and snails last.	Science: Discussion. What a fish must have to live. Compare what a plant, fish, and man must have in order to live and be healthy.		Can students listen to information, and ask and/or answer verbally questions that pertain specifically to the content of the readings? Can students read the chart?

8. CREATIVE WRITING Observe fish for a few minutes. Write short paragraph or story. Topics: If I Were A Fish. . . . If I Were A Snail. . . . (What my world is like; what I see and touch.) Have students write stories as if they were a fish or snail living in the aquarium. Read stories to the class.			Can the student write a sentence, paragraph, or story, pretending to be a fish describing his world? Can the student read his work?
9. INTRODUCING ENVIRONMENT Summarize the world the fish live in. Introduce <u>environment</u>, relating it to fish's life in the aquarium. Stress that we have an environment, too. It is everything and everyone that is around us, all the things in our world that affect us.		Word card: <u>environment</u>	Can student recognize and say "environment" when shown on a word card? Can student list or name objects in their environment?
10. BRAINSTORM Have a time when children can name things in their environment. Anything (objects or people) is acceptable. As students call out their ideas, write words on the board. After brainstorming session circle the key words: air, land, water, trees. Read words together.			
11. WORD STUDY - Is the air we breathe as clean as it should be? Why or why not?			Can students talk about our water and air resources, making observations?

NUMBER SKILLS

PRE-TEST FOR NUMBER SKILLS*

Directions:

The Pre-test for Number Skills has been broken down into six sections for more convenient use. It is not necessary to require students to complete all six sections of the Pre-test. Administer enough sections to ascertain the student's functioning level. If a section appears to be too easy for a student, move to a more advanced section. If a section is too difficult, drop to a lower level.

Through your observations and selected sections of the Pre-test, determine how the student works, his types of errors, and his lack of concepts. These facts will enable you to select appropriate activities from the supplementary list.

The Pre-test may be administered orally, in mimeographed form, or at the chalkboard. Select the presentation method that best suits the test item. Certain sections of the test are best administered individually (Sections I, II, and parts of Section III). Other sections (Sections IV, V, and VI) may be administered on a group basis.

*From Arithmetic Curriculum for the Mentally Handicapped, Department of Special Education, Cardinal Stritch College.

PRE-TEST FOR NUMBER SKILLS

SECTION I

Test Items	Testing Suggestions
1. One _____ Many _____	1. Show the child two separate boxes, one having one block, one having many. Ask the child to "Show me one block". "Show me many blocks."
2. One for each _____	2. Using an egg carton, ask the child to place one block in each section of the carton.
3. Enough _____ Not enough _____ Too many _____	3. Show the child three egg cartons with objects. Ask him to find the carton that has just enough objects (one in each section); the one that does not have enough; the one that has too many.
4. Counting (list to highest number) Rote Count _____	4. Test rote counting: "Help me count . . ."
5. Rote Rhythm Count: Counts smoothly with alternating body rhythm _____ Counts smoothly using dominant hand _____ Counts chimes, bells, other sounds _____	5. Child counts while slapping his knees, first with one hand, then with the other. Note if the child gives one slap for each number. Direct him to beat a drum in the same way. Next direct him to tap the drum with his dominant hand, counting. Direct the child to listen and count while the teacher strikes a bell, or produces other sounds.
6. Rational Count: Counts objects _____ Shows finger groupings: 1 _____ 2 _____ 3 _____	6. Line up three objects; test if the child counts them accurately. Add more objects. Ask the child to show one finger, two fingers, three fingers.
7. Big _____ Little _____ Tall _____ Short _____	7. Ask the child to draw a big ball on the chalkboard; a little ball. Ask the child to make himself tall; to make himself short.

1. Number Recognition 1 2 3 4 5 6 7	1. Number Recognition a. Teacher flashes number card to child. b. Teacher writes number on chalkboard and asks child to identify the number. c. Teacher indicates numbers in books and asks child to identify these numbers.
2. Writing Numbers From copy: 1 2 3 4 5 6 7 From dictation: 1 2 3 4 5 6 7	2. Writing Numbers a. Teacher asks child to copy symbols from the chalkboard or from a teacher copy. b. Teacher asks child to write numbers as they are dictated.
3. Rational Counting 1 2 3 4 5 6 7	3. Rational Counting a. Teacher shows a number to the child and asks him to place the required number of objects next to the number. b. Teacher writes the number on chalkboard and the child is required to make corresponding number of circles or lines. c. Teacher draws circles and the child is required to write the correct number below.
4. Groupings 1 2 3 4 5 6 7	4. Groupings a. Teacher arranges objects in number groupings and asks the child to identify the group without counting each object. b. Teacher draws objects on the chalkboard in groupings and asks the child to identify the group.

SECTION II (cont.)

5. Rote Counting To _____	5. Rote Counting Ask the child to count and note when he omits a number. Record the last number correctly given.
6. Serial Order Errors _____ All correct _____	6. Serial Order a. Teacher writes numbers on paper or chalkboard leaving blanks for the child to fill in. b. Teacher shuffles number cards and asks child to arrange them in correct order.
7. Measurement Vocabulary Big _____ Little _____ Over _____ Under _____ Top _____ Bottom _____ In front of _____ Behind _____ Tall _____ Short _____ Long _____ Short _____ Fast _____ Slow _____ Hot _____ Cold _____	7. Measurement Vocabulary a. Teacher uses objects of grossly varying sizes; asks child to identify the designated one. b. Objects are used for testing terms of position. The child is asked to place a block (or some other suitable object) according to direction. c. Use objects or experiences to check the child's comprehension of indicated concepts.
8. Problem Solving Vocabulary Add _____ Take away _____ Nothing left _____ More _____ Less _____	8. Problem Solving Vocabulary a. Teacher starts a block tower and asks the child to add one more, take one away, take all away, tell what is left. b. The child is directed to add objects to an existing group and to express the idea that now there is more; take some away and express the idea that now there is less.

GUIDING PRINCIPLES IN TEACHING ARITHMETIC*

1. Check pupil readiness for each new concept or skill you plan to teach.
 - a. Mental age.
 - b. Informal inventory test that includes actual work level and teacher observations. This inventory should include how the child works, his types of errors and his lack of concepts.
 - c. Provide foundation work in building meaningful arithmetic vocabulary and in establishing number concepts.
2. Pace the work to the child's own rate of learning.
3. Establish a functional attitude toward arithmetic.
 - a. Make sure the child applies what he knows in daily meaningful activities and situations.
 - b. Present every number concept in some situation as it is used in life.
 - c. Be alert to and use the number possibilities present in various social studies, science, health and in everyday child experiences.
4. Guide the transfer from concrete to abstract. See Six Steps in Making the Transfer from Concrete to Abstract Symbols.
5. Secure retention by seizing every opportunity for use of known skills, such as counting out papers for groups.

*Adapted from Resource Guide for Special Education Teachers, State of Hawaii, Department of Education.

ACTIVITIES

NOTES

CORRELATED ACTIVITIES

MATERIALS

EVALUATION

SIX STEPS IN MAKING THE TRANSFER FROM CONCRETE TO ABSTRACT SYMBOLS*

1. An incidental experience with numbers.
Jim found 2 rocks. Later he found 4. He discovers he now has 6.
2. Several experiences in which the same combination of quantities occur.
 - a. This morning there were two robins at the bird feeder and 4 blue jays on the ground.
 - b. James had 2 pennies. His mother gave him 4 more.
 - c. There are 2 milk cartons on this table and 4 on that table.
 - d. She has 2 crayons and he has 4 crayons.
3. A picture story of each experience drawn by children to illustrate the above experiences.

4. Simplified pictures - picture groupings of the materials involved in each experience.

5. The pattern - conventionalized patterns of the quantities in various groupings.

6. The symbol - numerals involved in the combinations.

$$\begin{array}{r} 2 \\ + 4 \\ \hline 6 \end{array}$$

$$2 + 4 =$$

$$4 + 2 =$$

EVALUATION

ACTIVITIES	CORRELATED ACTIVITIES	MATERIALS	EVALUATION
1. BIG - LITTLE Read Jack and the Beanstalk or a similar story involving big and little characters. Children may pantomime big and little, find big and little items in the classroom, or reenact the story.	P.E.: "Big Steps/Little Steps" (a variation of Giant Steps).	A record, filmstrip, or film may be substituted for the book.	Is the child able to identify the big and little characters in the story?
2. BIG - LITTLE Measure the children, noting their heights on the wall, chalkboard, or separate chart. Label each child's height with his name. Pair children according to big:big, little:little, and/or big:little. Encourage the children to select the child that is big or little according to teacher direction.	Children may also classify pairs of children as to same or different heights. Bulletin Board: See Measurement I Art: Draw someone who is big (father, older brother, etc.). Draw someone who is small (see Measurement I).	Drawing paper, crayons, Measurement I	Is the child able to discriminate big and little in the heights of his classmates?
3. BIG - LITTLE Instruct the child to find a big block, a little car, etc. Match two big blocks, two little blocks, a big block and a little ball, etc.		A variety of big and little objects. A worksheet completed under teacher supervision requiring the child to color or circle specific big and little items.	Can the child identify on paper the concepts of big and little?
4. BIG - LITTLE Place a big and a little item in a paper bag. Using only the sense of touch, have the child select a designated item. Vary the procedure by requiring the child to describe the little item and/or the big item.		Paper bag, various big and little items. Sense and Tell <u>Locomotor materials</u>	Can the child tactically discriminate between big and little?

1. DAY - NIGHT Discuss the children's activities during the day and during the night.	Masic: "This Is the Way We Wash Our Clothes" Add additional verses to portray day and night activities.	Bowmar Study Prints-- <u>Thinking and Reasoning: It is Morning, It is Evening, It is Night-time</u>	Is the child able to classify activities into day and night categories?
2. DAY - NIGHT Distribute scissors and magazines to the children with instructions to find pictures of things you can see and do during the day and during the night. (Committees may be assigned a topic to search, such as, "What can you see during the day?" or, "What can you do at night?")	Art: Let children select an activity to illustrate. Combine clock faces with illustrations to make Bulletin Board Time II.	Bulletin Board: Time I Scissors Magazines	Is the child able to identify magazine pictures of day and night activities and scenes?
3. MORNING - AFTERNOON Make clock faces showing specific times for daily activities, such as lunch, recess, sharing time, etc. Divide clock faces according to morning or afternoon activities.		Bulletin Board: Time II	Can the child correctly identify an activity as belonging to the morning or afternoon?
4. CLOCK NUMBERS (Children should have the number concepts 1 to 12.) Draw a large circle on the floor. Give 12 children a card with a number 1 to 12. Arrange the children around the circle to correspond to the numbers on a clock. Mix children and cards and let them find their position on the clock.		Large circle on the floor. 12 squares of paper each with a number 1 to 12. <u>Time and Telling Time</u>	Can the child find the place on the circle that corresponds with his number?
